ACCESS MENTAL HEALTH AGENCY

PAYMENT

AMHA accepts Medicaid, Medicare, Amerigroup, Wellcare and PeachState. Patients must have insurance. Credit cards, cash or checks are not accepted.

OUR TEAM OF MENTAL HEALTH PROFESSIONALS

Our team of healthcare professionals brings their many years of education, training and experience to the service of those for whom we care. Included are Psychiatrists, social workers, nurses, therapists and support staff. Together we work to provide a very individualized and effective treatment program to improve the quality of life for those for whom we serve.

BEHAVIOR

Behavioral Health Assessment: Person-centered assessments designed to determine the client's problems, strengths, needs, abilities, support system, functional level and the degree to which the client is integrated into the community.

Community Support: Rehabilitative, environmental support and resources coordination is considered essential to assist a client and family in gaining access to necessary services that help youth develop skills to promote stability and build toward age appropriate functioning in their daily environment.

Crisis Intervention Services: Services directed toward the support of a client who is experiencing an abrupt and substantial change in behavior which is causing a marked increase in personal distress.

Diagnostic Assessments: Telemedical psychiatric examination that includes history; mental status exam; physical evaluation and assessment; screening and/or assessment of withdrawal symptoms for clients with substance related diagnoses.

AL HEALTH

Counseling & Training (Individual/Family/Group): Therapists provide therapeutic intervention services directed toward achievement of specific goals including promoting resiliency, maintenance of cognitive skills, healthy coping mechanisms, adaptive behaviors and skills, identification and resolution of personal, social, intrapersonal and interpersonal concerns.

Nursing Assessment and Health Service: Face-to-face contact with client designed to monitor, evaluate, assess, and carry out a physician's orders regarding psychological and physical problems and general wellness.

Psychiatric Treatment: Specialized medical and psychiatric services including evaluation and assessment of physiological phenomena and the assessment and monitoring of an individual's status in relation to treatment with medication.

**ACCESS
MENTAL HEALTH AGENCY**

SERVICES

Medication Administration: Upon Physician's orders, medical personnel provide medication to clients in one or more of the following ways: Oral, nasal, inhalant, intramuscular injection, topical or intraocular.

Psychosocial Rehabilitative Support: Services that help adults develop skills to self manage symptoms and improve their functioning in their home, work, and social environments.

Addictive Disease Support Services: Substance abuse recovery services that support and build on the strengths and resilience of individuals to help prevent relapse and promotes their recovery.

Case Management: Services that provide care coordination to help individuals gain access to community resources and services that promote their recovery.
